## OBJECTIVE

A passionate and inquisitive Computer Science student who enjoys solving real-world problems using creative thought and code. I have developed from team leading, time management from project to project, and creating everything from websites to backend infrastructure. I wish to be a full-fledged developer who not only codes but also contributes back to the people and communities that benefit from my work.

---

## EDUCATION

**Chandigarh University, Mohali, Punjab**

*Bachelors in Computer Science and Engineering (CGPA - 8.23)*

**2022 - Present**

**D.A.V. Public Sr. Sec. School, Parwanoo, Himachal Pradesh**

*Class XII - 81% (CBSE)*

**2005 - 2021**

*Class X - 90% (CBSE)*

---

## SKILLS

**Languages:** C, C++, JAVA, HTML, CSS, Python, JavaScript, Kotlin.

**Frontend Development:** React.js, React Router, Tailwind CSS, Axios, HTML5, CSS3

**Backend Development:** Java (Spring Boot), RESTful APIs, Google OAuth, JWT Authentication

**Databases & Storage:** MySQL, PostgreSQL, MS SQL, Supabase, pgAdmin

**Development Tools & Platforms:** Git, GitHub, VS Code, IntelliJ IDEA, Android Studio, Postman, Netlify, Vercel, Render, Figma, Canva

**Computer Science Fundamentals:** Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Internet of Things

---

## PROJECTS

**Wisho : Personalized Wish Generator Website**

**May - 2025**

- Wisho is a full-stack AI-powered web application that generates personalized wishes for birthdays, anniversaries, achievements, and other special occasions.
- It solves the problem of repetitive greetings by allowing users to customize tone (formal, casual, sarcastic), format (line, paragraph, poem), and include personal memories.
- A user-friendly interface guides users through selecting event type, tone, message format, and optional memories, then leverages Google Gemini API to craft a tailored message.
- Tech Stack:** React.js, JavaScript, Tailwind CSS, HTML5, Supabase, Axios, localStorage, Spring Boot, Google OAuth.

**Delsol : A Smart File Management Utility**

**November - 2024**

- A smart file management tool that automates the detection and deletion of redundant files based on file type and creation date, with an interactive GUI.
- Designed to streamline digital storage, reduce manual cleanup effort, and prevent accidental deletions through a file preview and exclusion system.
- Tech Stack:** Python, PyQt5 (GUI Development), OS module, File System Operations.
